8– 10. (Canceled)

11. (Previously Presented) The personal information utilization system according to claim 2, wherein the first commodity provision information registered in said personal information storage means is such information that said processing means associates personal information of said information disclosing person and first commodity provision information and receives said associated information from an information register side terminal via said

communication means; checks said received personal information with personal information stored in said personal information storage means; identifies the information disclosing person of said received personal information, as a result of said checking, if said received personal information coincides with the personal information stored in said personal information storage means; and registers said first commodity purchasing information received for each identified information disclosing person in said personal information storage means.

12. (Previously Presented) The personal information utilization system according to claim 2, wherein said information searching person includes at least a manufacture, a sales vendor, a service trader, a self-governing body or an education foundation.

13. (Previously Presented) The personal information utilization system according to claim 2, wherein the personal information on the information disclosing person registered in said personal information storage means is such information that the processing means is allowed to receive information on disclosure limits representing disclosure limits for the personal information on the information disclosing person, from the information disclosure side terminal via the communication means and that the personal information storage means is allowed to manage in accordance with the received information on disclosure limits.

14. (Previously Presented) The personal information utilization program according to claim 7, wherein the first commodity provision information registered in said personal information storage means is such information that said processing means is allowed to associate personal information of said information disclosing person and first commodity provision information; and to receive said associated information from the information register side terminal via said communication means; to check said received personal information with personal information stored in said personal information storage means; to identify an information disclosing person of said received personal information as a result of said checking, if said received personal information coincides with the personal information stored in said personal information storage means; and to register said first commodity

purchasing information received for each identified information disclosing person in said personal information storage means.

15. (Previously Presented) The personal information utilization program according to claim 7, wherein said information searching person includes at least a manufacturer, a sales vendor, a service trader, a self-governing body or an education foundation.

16. (Previously Presented) The personal information utilization program according to claim 7, wherein the personal information on the information disclosing person registered in said personal information storage means is such information that the processing means is allowed to receive information on disclosure limits representing disclosure limits for the personal information on the information disclosing person, from the information disclosure side terminal via the communication means and that the personal information storage means is allowed to manage in accordance with the received information on disclosure limits.

17. (Previously Presented) The personal information utilization system of claim 2, wherein the first commodity provision information is automatically registered via an information register side terminal.

18. (Previously Presented) The personal information utilization system of claim 2, wherein the first commodity provision information comprises a name of an item, a name of a vendor, and a date when the vendor provided the item.

19. (New) The personal information utilization system of claim 2, wherein said identifying comprises determining an identity, previously unknown to be associated with the second commodity information, of the information disclosing person based on the coincidence of the first commodity provision information with the second commodity provision information.
